Ludhiana, Punjab

PROJECTS

AI Website Builder

GitHub Link: github.com/Gurkirat33/AI-Website-builder

Technologies Used: React, Nodejs, Express, MongoDB, Tailwind CSS, Redis, Redux

Features:

- Users can generate unique websites with AI-driven content, utilizing a library of over 50 customizable templates. The platform allows real-time editing, enabling adjustments to text, images, and layouts.
- The platform supports creating and managing multiple pages with automated deployment, ensuring updates are applied across the site efficiently.

Real-Time Coding Interview Platform

GitHub Link: github.com/Gurkirat33/Interview-App

Technologies Used: React, Nodejs, Express, MongoDB, Tailwind CSS, Socket.io, Web Sockets, Redux

Features:

- During interviews, the platform allows an admin to monitor the interviewee's screen and check if they are in full screen and focus mode. The admin can provide real-time feedback, make remarks, and manage the overall session effectively
- The integrated code editor supports multiple programming languages, enabling the interviewee to write and execute code during the session. The editor displays real-time output and error messages.

Stake Clone (Mine Game)

GitHub Link: github.com/Gurkirat33/StakeClone

Technologies Used: React, Nodejs, Express, MongoDB, Tailwind CSS, Redux

Features:

- The game determines if a cell contains a mine or a gem based on over 10 parameters, including previous winnings and total profit or loss, ensuring outcomes are influenced by these variables.

WORK EXPERIENCE

Industrial Training

Hawk QA Software Solutions

June 2023 – Aug 2023

Ludhiana, Punjab

- **Web Development:** Hands-on experience in web design and development, including HTML, CSS, Bootstrap, and responsive UI techniques.
